Between noun incorporation and lexical affixation in Abaza

Peter Arkadiev

Institute of Slavic Studies of the Russian Academy of Sciences &
Russian State University for the Humanities
alpgurev@gmail.com

What is “noun incorporation”?

Mithun (1984: 847-848):

- “In [Noun Incorporation], a N stem is compounded with a V stem to yield a larger, derived V stem.”
- “Interestingly, all languages which exhibit such morphological structures also have syntactic paraphrases.”

What is “noun incorporation”?

Chukchi (Chukotkan, Russia; Muravjeva 2004: 115):

- (1) a. *gəm-nan tekicgə-n tə-pela-gʔan*
1SG-ERG meat-ABS.SG 1SG.S-leave-PST.3SG.O
- b. *gəm tə-takecgə-pela-gʔak*
1SG.ABS 1SG.S-meat-leave-PST.1SG.S
'a=b. I left the / some meat.'

Southern Tiwa (Kiowa-Tanoan, USA; Allen et al. 1984: 295):

- (2) a. *yede seuan-ide a-mũ-ban*
that man-SUF 2SG-see-PST
- b. *yede a-seuan-mũ-ban*
that 2SG-man-see-PST
'a=b. You saw that man.'

What is “noun incorporation”?

Baker (1988: 80) and later generative work (see an overview in Johns 2017):

- “The **productivity and the referential transparency** of NI suggest that it is a **syntactic** process, rather than a lexical one <...> the verb <...> and the noun root <...> combine into a single word <...> by Move-Alpha, which moves the structurally lower lexical item (the noun) to adjoin to the higher lexical item [the verb] in the syntax”

What is “noun incorporation”?

Not only generative linguists, cf. Olthof (2020: 16) in the framework of Functional Discourse Grammar:

- “In this study, we restrict the term noun incorporation to **productive, semantically transparent processes** in which a nominal and a verbal unit at R[eferential]L[evel] together form a single verbal Word at M[orphosyntactic]L[evel]. <...> More specifically, we define noun incorporation constructions as cases in which a nominal and a verbal unit that are in a **dependency relation of the form head-modifier or predicate-argument** at RL form a single verbal Morphosyntactic Word.”

What is “noun incorporation”?

Not all definitions are so restrictive, though.

De Reuse (1994: 2842):

- “Noun incorporation refers to the morphological construction where a **nominal lexical element is added to a verbal lexical element; the resulting construction being a verb and a single word**. The definition cannot be made more precise than that, because there is widespread disagreement <...>”

What is “noun incorporation”?

Not all definitions are so restrictive, though.

Massam (2009: 1078):

- “[W]e adopt the broad working definition of NI as a grammatical construction where a **nominal that would canonically (either in the given language, or in languages in general) be expressed as an independent argument or adjunct** is instead in some way incorporated into the verbal element of the sentence, forming part of the predicate.”

What is “noun incorporation”?

“Non-prototypical” (or “non-canonical”?) noun incorporation (cf. Mithun 2000):

- not necessarily highly productive:
 - only a subset of verbs are incorporating (Olthof et al. 2021);
 - only a subset of nouns can be incorporated
- the semantic role of the nominal root is not necessarily patient/theme:
 - incorporation of instruments;
 - incorporation of spatial modifiers.

In this talk

- The Northwest Caucasian (Abkhaz-Adyghean) languages are not mentioned in the literature on noun incorporation.
- This is not accidental: indeed, examples like (1) and (2) do not occur in NWC.
- Nevertheless, focusing on Abaza, I shall argue that NWV languages not only show clear traces of historical noun incorporation, but also possess phenomena that can be analysed as incorporation even synchronically.
- These phenomena, which form a cline from noun-incorporation to lexical affixation (Mithun 1997), are fairly non-trivial from a typological perspective.

Abaza

- *abáza bəzšá* (абазы бызшва), ISO 639-3 abq
- Ca. 38 000 speakers in Russia (Karachay-Cherkess Republic), ca. 10 000 in Turkey

Abaza

- Northwest Caucasian (Abkhaz-Adyghe)
 - Circassian: West Circassian (Adyghe), Kabardian (East Circassian)
 - † Ubykh
 - Abkhaz-Abaza: Abaza, Abkhaz

Abaza

- Northwest Caucasian (Abkhaz-Adyghe)
 - Circassian: West Circassian (Adyghe), Kabardian (East Circassian)
 - † Ubykh
 - Abkhaz-Abaza: Abaza, Abkhaz

Abaza

- The least-described language of the Northwest Caucasian family
- Descriptive works exist (e.g. Genko 1955, Tabulova 1976, Lomtaticidze et al. 1989, O'Herin 2002), but are insufficient

Abaza

- rich consonantism and impoverished vocalism
- polysynthesis and consistent head-marking
- ergativity
- no core case marking
- weak distinction between parts of speech
- rich system of valency-increasing derivations, especially applicatives
- a complex system of marking spatial information in the verb

Hewitt 2005; Arkadiev & Lander 2021 on NWC in general

Abaza

The Abaza verbal template:

		“preverbs” (Π)								“stem” (Σ)					“endings”				
-12	-11	-10	-9	-8	-7	-6	-5	-4	-3	-2	-1	0	+1	+2	+3	+4	+5	+6	+7

locative preverbs

Locative preverbs

- Are found in all NWC languages:
 - ca. 30 in Circassian;
 - ca. 50 in Ubykh;
 - more than 100 in Abkhaz and Abaza (Avidzba 2017, Spruit 1986: 22-31)
- Express a variety a spatial and metaphorical meanings ranging from very abstract to very concrete.
- Often serve as applicatives introducing the landmark as an indirect object argument that can be cross-referenced in the verb.
- Can be simplex or complex.
- Differ in productivity.
- Obligatory in some cases, and often lexicalised.

Locative preverbs

- (3) *a-wasa* *a-š'acara* *jə-la-wə-m-sa-n*
 DEF-sheep DEF-lawn 3SG.N.ABS-LOC:mass-2SG.M.ERG-NEG-shear-IMP

'The bird flew **through** the window.' (Klychev 1995: 131)

Locative preverbs

Locative preverbs

- NWC locative preverbs fall into the broad class of so-called “**lexical affixes**”, i.e. morphologically bound elements that modify roots but themselves have very concrete semantics resembling that of roots.
- Cross-linguistically, lexical affixes express
 - body-parts (e.g. as instruments);
 - salient artifacts or natural objects;
 - locations;
 - various other adverbial notions.

Mithun 1997; Mattissen 2004: 190-194; 2006: 297-333

Locative preverbs

- Diachronically, most locative preverbs in NWC go back to incorporated nouns, mainly denoting parts of body or other objects (Kumakhov 1964: 164-182, 1989: 200-228; Lomtadze 1983; Avidzba 2017; Arkadiev & Maisak 2018: 121-125).
- A cross-linguistically common historical path for lexical affixes (Mithun 1984: 885–887; Mithun 1997: 365-366; Kinkade 1998; Mattissen 2006).
- NWC are in many cases much more transparently related to the corresponding nouns than e.g. the body-part prefixes in the Panoan languages (Fleck 2006, Zariquiey & Fleck 2012).

Locative preverbs

- Locative preverbs related to nouns:

West Circassian (Kumakhov 1964: 177-179):

- (6) *ḵ^weçə* 'intestines': *ḵ^weçə-λhe-n* 'put inside smth'
ḵ^weçə-rə-čə-n 'run through smth'
- (7) *ʔ^wə* 'mouth': *ʔ^wə-c^we-n* 'stand near smth'
ʔ^wə-š'ə-n 'lead away from smth'

Locative preverbs

- Some preverbs can be treated as incorporated nouns even synchronically.

Kabardian (Kumakhov 1964: 181-182)

(8) *ŕhe* 'head': *ŕhe-rə-xə-n* 'take from one's head'

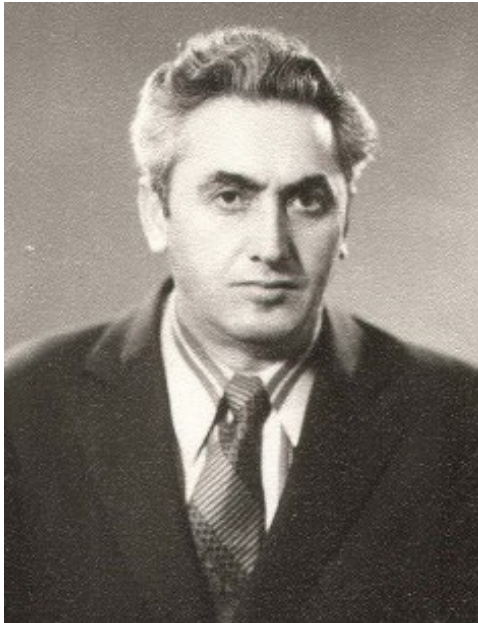

(9) *ʔe* 'hand': *ʔe-ŕe-xə-n* 'take from one's hands'

Why Abaza?

- Abaza (and, mutatis mutandis, Abkhaz) offers much richer and varied material on noun incorporation than the rest of the family.
- Abaza locative preverbs happen to be amply documented.

Why Abaza?

- Prof. Dr. Rauf Klychev (Кълыч Рауф, 1934-1993)
- *A Dictionary of Collocations of Locative Preverbs with Suffixoids and Verbs in Abaza* (in Russian, Cherkessk, 1995).
- Ca. 4300 verbs with 150 preverbs.

Incorporation in Abaza (I): body-part nouns

- More than a dozen preverbs are related to body-part nouns.
- Some of them are clearly highly grammaticalised and desemanticised.

bʏa 'back, waist' > 'down' (*bʏa*-pš-*ra* 'look down', K: 53)

waça 'intestines' > 'inside a container' (*waça*-ž-*ra* 'to boil inside smth', K: 239)

mg^wa 'belly' > 'wrapped up' (*mg^wa*-š-*ra* 'to freeze being dressed up', K: 161)

qa 'head' > 'above', see (10) below

Incorporation in Abaza (I): body-part nouns

- Body-part preverbs widely differ in their productivity (data from Klychev 1995, including complex preverbs):

<i>qa-</i> ‘head, above’	> 200 verbs
<i>ča-</i> ‘face, vertical surface’	> 200 verbs
<i>š’ta-</i> ‘trace, after’	175 verbs
<i>waça-</i> ‘intestines, container’	137 verbs
<i>napə-ça-</i> ‘in the hand’	59 verbs
<i>g^wə-</i> ‘heart’	53 verbs
<i>čə-</i> ‘skin, surface’	48 verbs
<i>lakta-</i> ‘face’	17 verbs
<i>q^wda-</i> ‘neck’	15 verbs
<i>k^wa-</i> ‘bosom’	6 verbs
<i>š’q^wa-</i> ‘heel’	2 verbs

Incorporation in Abaza (I): body-part nouns

- Body-part preverbs function as applicatives and introduce the landmark as an indirect object cross-referenced by a personal prefix immediately preceding the preverb:
- *qa* 'head' > 'above':

(10) a. *a-č'kʷən* *a-ɜəχ'* *d-a-qa-č-t*
DEF-youth DEF-spring 3SG.H.ABS-3SG.N.IO-LOC:above-
sleep(AOR)-DCL

‘The guy fell asleep over the spring of water.’ (K: 258)

b. *anəj a-mašak^w wə-qa-sə-r.pa-p̌*
 MED DEF-sack 2SG.M.IO-LOC:above-1SG.ERG-pull-
 NPST.DCL

'I'll pull this sack on you.' (K: 255)

Incorporation in Abaza (I): body-part nouns

- In some cases the same preverb retains its body-part meaning.
- Then the personal prefix refers to the possessor of the body-part.
- *qa* ‘head’ > ‘above’:

(11) *j-qəlpə* *j-qa-ŝ-əw-n*
3SG.M.IO-hat 3SG.M.IO-LOC:head-fall-IPF-PST
‘The hat fit his head well (lit. fell on his head).’ (K: 260)

Incorporation in Abaza (I): body-part nouns

- Some body-part preverbs retain their lexical meaning, reference and anchoring to a possessor in almost all cases:

- (12) *a-saba* *ʃa-rə-lakta-pl-əw-n*
DEF-dust CSL-3PL.IO-LOC:face-pour.powder-IPF-PST
'Dust was pouring onto their faces.' (K: 154)
- (13) *arqan-g'əj* *ʃ-a-q^wdə-j-χ-χə-n*
rope-ADD CSL-3SG.N.IO-LOC:neck-3SG.M.ERG-take-RE-PST
'He took the rope off its (the stallion's) neck' (AbTa: 142)
- (14) *a-3ə* *jə-k^wa-ĉ-əw-n*
DEF-water 3SG.M.IO-LOC:bosom-pour.liquid-IPF-PST
'Water was pouring into his bosom.' (K: 138)

Incorporation in Abaza (I): body-part nouns

- Other body part preverbs are used both in the original and in the spatial meaning:
- *ča-* ‘mouth, face’ > ‘vertical surface’

(15) a. *a-č'kʷən* *a-narzan* *j-ča-žž-wa-n*
DEF-youth DEF-mineral.water 3SG.M.IO-LOC:mouth-flow-
IPF-PST

‘Mineral water was flowing into the guy’s mouth.’ (K: 313)

b. *a-wasa-k^wa* *a-ḱaʒa*
DEF-sheep-PL DEF-slope

j-a-ča-r-px'a3-aʷ-n
3PL.ABS-3SG.N.IO-LOC:mouth-3PL.ERG-считать-IPF-PST

'They were counting sheep on the mountain slope.' (K: 316)

Incorporation in Abaza (I): body-part nouns

- Other body part preverbs are used both in the original and in the spatial meaning:
- *ʒa-* ‘cheek’ > ‘lateral surface’

- (16) a. *də-j-ʒa-kš-əw-n*
3SG.H.ABS-3SG.M.IO-LOC:cheek-hit-IPF-PST
‘S/he was beating him on the cheek.’ (K: 98)
- b. *a-kdə ʒa-r-bəl-wa-n*
DEF-stump LOC:cheek-3PL.ERG-burn-IPF-PST
‘They were burning the stump on one side.’ (K: 99)

Incorporation in Abaza (I): body-part nouns

- Some of the body-part preverbs are lexicalised rather than grammaticalised and are used in metaphorical meanings:

(17) *j-r-a-s-h^w-wa-š*

REL.ABS-3PL.IO-DAT-1SG.ERG-say-IPF-FUT

ʃa-s-g^wa-q^wəc-ṭ

CSL-1SG.IO-LOC:heart-think(AOR)-DCL

‘I decided what I shall tell them (lit. it thought in my heart).’ (K: 72)

(18) *j-ʃa-s-g^wa-la-ša-χ-ṭ*

3PL.ABS-CSL-1SG.IO-LOC:heart-LOC:mass-fall-RE(AOR)-DCL

‘I recalled them (lit. they fell back into my heart).’ (K: 76)

Incorporation in Abaza (I): body-part nouns

- A special case: *napə* ‘hand’
 - is only used in combination with the preverb *ça-* ‘under’
 - has both the literal and metaphorical meanings

- (19) a. *a-kʷtaβʹ s-napə-ça-p.č-t*
 DEF-egg 1SG.IO-LOC:hand-LOC:under-break(AOR)-DCL
 ‘The egg broke in my hands.’ (K: 170)
- b. *də-r-napə-ça-ša-t*
 3SG.H.ABS-3PL.IO-LOC:hand-LOC:under-fall(AOR)-DCL
a-hažʹrat-kʷa
 DEF-robber-PL
 ‘[A man] was attacked by (lit. fell under the hands of) robbers’ (AbLu 10:30)

Incorporation in Abaza (I): body-part nouns

- Other body-part preverbs can also serve as the first part of a complex preverb:

- (20) a. *a-č'k^wən ajnəž*
DEF-youth DEF+giant
də-j-ča-ta-kša-t
3SG.H.ABS-3SG.M.IO-LOC:mouth-LOC:in-hit(AOR)-DCL
'The guy hit the giant in the face.' (K: 328)
- b. *a-qaça j-ša-j-qa-ta-čə-t*
DEF-man 3SG.N.ABS-CSL-3SG.M.IO-LOC:head-LOC:in-
sit(AOR)-DCL
'The man got angry (lit. it sat down into his head).'
(K: 269-270)

Incorporation in Abaza (II): non-relational nouns

- Ca. dozen preverbs correspond to non-relational nouns denoting salient artefacts or locations.
- Most of them retain their lexical meaning.

<i>č̣kara</i> ‘courtyard’	180 verbs
<i>ʃ^wna</i> ‘house, room’	150 verbs
<i>č̣ʃ^wa</i> ‘oven’	125 verbs
<i>g^wara</i> ‘fence, enclosure’	55 verbs
<i>pṣ̌ça</i> ‘courtyard’	40 verbs
<i>q^wa</i> ‘ashes’	11 verbs
<i>gara</i> ‘cradle’	8 verbs
<i>č̣ə</i> ‘horse’	6 verbs

Incorporation in Abaza (II): non-relational nouns

- Such incorporated nouns can express a referential spatial landmark involved in the event.

(21) *a-sabəj* *d-gara-l-g^wa-n*
DEF-child 3SG.H.ABS-LOC:cradle-3SG.ERG-lay-PST
'She laid the child into the cradle.' (K: 67)

(22) *w-g^wara-pš-ta* *w-ʕa.j.χ*
2SG.M.ABS-LOC:fence-look-ADV 2SG.M.ABS-return(IMP)
'Look in the courtyard (lit. inside the fence) and come back.' (K: 69)

Incorporation in Abaza (II): non-relational nouns

- Being referentially autonomous, most such preverbs occur without a pronominal prefix.
- Still, some can take prefixes cross-referencing the possessor and develop more abstract spatial meanings.
- š'kla 'stirrup' > 'following'

(23) d-rə-š'kla-šš-ṭ
3SG.H.ABS-3PL.IO-LOC:stirrup-whistle (AOR)-DCL
'He whistled after them.' (K: 332)

Incorporation in Abaza (II): non-relational nouns

- Some occur only as part of complex preverbs:

(24) *d-q^wa-la-j-g^wa-t*

3SG.H.ABS-LOC:ashes-LOC:mass-3SG.M.ERG-lay(AOR)-DCL

‘He knocked him (the giant) down into ashes.’ (K: 273)

(25) *sawsrəq^wa d-čə-ž-pa-t*

Sosruko 3SG.H.ABS-LOC:horse-LOC-jump(AOR)-DCL

‘Sosruko jumped off his horse.’ (K: 237)

Incorporation in Abaza (II): non-relational nouns

- Non-relational preverbs can be used as **verbal classifiers** lacking independent reference and corresponding to a landmark expressed as a full nominal.
- Such a landmark can have the same root as the preverb, or be synonymous or hyponymous to it.

Incorporation in Abaza (II): non-relational nouns

- (26) *rə-čʕ^wa* *d-čʕ^wa-pχa-t*
3PL.IO-oven 3SG.H.ABS-LOC:oven-warm_up(AOR)-DCL
'He warmed himself up near their oven.' (K: 213)
- (27) *a-k'adəg^w* *wə-čkara-l-p̃*
DEF-courtyard 2SG.M.ABS-LOC:yard-enter-NPST
'You will enter the courtyard.' (AbTa: 85)
- (28) *a-klub* *jə-ʕ^wna-n.χ-əj-t*
DEF-club 3PL.ABS-LOC:house-work-PRS-DCL
'They work in the club.' (K: 88)

From incorporated nouns to affixes

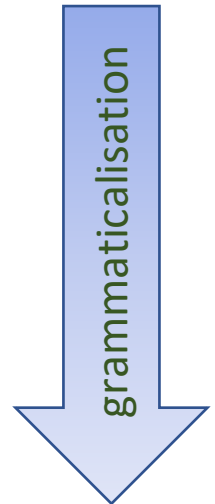

- Abaza locative preverbs form a continuum:

	have related nouns	retain lexical meaning	example
type I	yes	always	<i>lakta</i> - 'face' <i>gara</i> - 'craddle'
type II	yes	sometimes	<i>ča</i> - 'face, vertical surface' <i>ɬ^wna</i> 'house, room'
type III	yes	no	<i>qa</i> - 'head' > 'above' <i>š'kla</i> 'stirrup' > 'behind'
type IV	no	no	<i>ta</i> - 'inside', <i>ča</i> - 'below'

From incorporated nouns to affixes

- Abaza locative preverbs form a continuum:

	have related nouns	retain lexical meaning	example
type I	yes	always	<i>lakta-</i> 'face' <i>gara-</i> 'craddle'
type II	yes	sometimes	<i>ča-</i> 'face, vertical surface' <i>ɬ^wna</i> 'house, room'
type III	yes	no	<i>qa-</i> 'head' > 'above' <i>š'kla</i> 'stirrup' > 'behind'
type IV	no	no	<i>ta-</i> 'inside', <i>ča-</i> 'below'

From incorporated nouns to affixes

- Abaza locative preverbs form a continuum:

	have related nouns	retain lexical meaning	example
type I	yes	always incorporation	<i>lakta-</i> 'face' <i>gara-</i> 'cradle'
type II	yes	sometimes	<i>ča-</i> 'face, vertical surface' <i>ʕ^wna</i> 'house, room'
type III	yes	no	<i>qa-</i> 'head' > 'above' <i>š'kla</i> 'stirrup' > 'behind'
type IV	no	lexical affixation	<i>ta-</i> 'inside', <i>ča-</i> 'below'

From incorporated nouns to affixes

- Grammaticalisation and affixalisation of incorporated nouns in Abaza is evidenced by their acquiring morphosemantic properties absent with nouns and characteristic of the indisputable lexical affixes.

From incorporated nouns to affixes

- Many preverbs in Abaza and Abkhaz distinguish **introvert** (essive-locative, with final *-a*) and **extravert** (elative, with apocope, final *-ə* or metathesis) forms (Spruit 1986: 16-17, Avidzba 2017).

(29) a. *a-qanž'a* *a-ŋ^wara* *j-ta-pssŋa-x-t*
DEF-crow 3SG.N.IO-nest 3SG.N.ABS-LOC:in-fly-RE(AOR)-DCL

'The crow flew back into its nest.' (K: 197)

b. *a-warba* *a-ɣ^wara* *j-tə-pssɣa-t*
 DEF-eagle 3SG.N.IO-nest 3SG.N.ABS-LOC:in.ELAT-fly(AOR)-DCL

‘The eagle flew out of its nest.’ (K: 205)

From incorporated nouns to affixes

- Many preverbs in Abaza and Abkhaz distinguish **introvert** (essive-locative, with final *-a*) and **extravert** (elative, with apocope, final *-ə* or metathesis) forms (Spruit 1986: 16-17, Avidzba 2017).

(29) a.

<i>a-ḡanž'a</i>	<i>a-ŋ^wara</i>	<i>j-ta-pssŋa-x-t</i>
DEF-crow	3SG.N.IO-nest	3SG.N.ABS-LOC:in-fly-
		RE(AOR)-DCL

'The crow flew back **into** its nest.' (K: 197) **introvert**

b. *a-warba* *a-ɣ^wara* *j-tə-pssɣa-t*
 DEF-eagle 3SG.N.IO-nest 3SG.N.ABS-LOC:in.ELAT-fly(AOR)-DCL

‘The eagle flew **out of** its nest.’ (K: 205) **extravert**

From incorporated nouns to affixes

- The same distinction is attested with preverbs I have classified as incorporated nouns.
- No evidence of a similar distinction outside the verb.
- A clear sign of affixalisation of the incorporated nouns.
- Notably, can precede semantic change.

From incorporated nouns to affixes

- With incorporated body-part nouns:

- (30) a. *a-ʒə* *jə-q^wda-žž-wa-n* introvert
DEF-water 3SG.M.IO-LOC:neck-pour:liquid-IPF-PST
'Water was pouring on his neck.' (K: 274)
- b. *a-mχ^w-k^wa* *lə-q^wdə-l-žə-t* extravert
DEF-beads-PL 3SG.F.IO-LOC:neck.ELAT-3SG.F.ERG-
tear_off(AOR)-DCL
'She tore the beads off her neck.' (K: 275)

From incorporated nouns to affixes

- With incorporated non-relational nouns:

- (31) a. $a\zeta^w$ $\check{\zeta}\zeta^w a-l-ga-t$ **introvert**
DEF+trough **LOC:oven**-3SG.F.ERG-carry(AOR)-DCL
'She brought the trough **to** the oven.' (K: 211)
- b. $d-\check{\zeta}\zeta^w \partial-r-ga-\chi-t$ **extravert**
3SG.H.ABS-**LOC:oven.ELAT**-3PL.ERG-carry-RE(AOR)-DCL
'They carried him **out of** the oven.' (K: 218)

Cross-linguistic perspective

- Body-part nouns are frequent targets of incorporation in the languages of the world (Mattissen 2006: 310–315; Massam 2009: 1090; Lehmann 2016: 43-47; Zariquiey 2018; Vinyar 2021; Olthof et al. 2021: 228).
- The path from body-part incorporation to applicatives is documented outside of NWC as well (Fleck 2006; Nordlinger 2019), *pace* Peterson (2007: 141).
- However, the semantic roles of incorporated body-part nouns are usually patient / theme or instrument, rather than spatial landmark.

Cross-linguistic perspective

Mohawk (Iroquoian, Canada, USA, Mithun 1996: 643)

- (32) *wa-hi-**kyhs**-ohare-?* patient
PST-1SG>3SG.M-**face**-мыть-PUNC
'I washed his face.'

Bininj Gun-wok (Gunwinyguan, Australia, Evans 1996: 84)

- (33) *ga-**bid**-wayda-n* instrument
3-**hand**-wave-NPST
'He is waving his hand.'

Cross-linguistic perspective

- Incorporation of body-parts as locations is, however, also attested, even if rarely.

Warray (Gunwinyguan, Australia, Harvey 1996: 144)

(34) *ngirri wang ban-nabat-nawa-m an-nebe-yang*
dog meat 1SG.O-hand-take-PFV.PST CL-hand-ABL
'The dog took the meat out of my hand.'

Oluta Popoluca (Mixe-Zoque, Mexico, Zavala 2000: 591)

(35) *sa:rakü ta=küx-tu:t-aʔx-ü-w=aʔ min=?unaʔk*
Sara 1.ABS=back-put-APPL-INV-CMPL-3 2.PR=son
'Sara put your son on my back.'

Cross-linguistic perspective

Mithun (1984: 874):

- Type IV noun incorporation, where “a generic N is incorporated to qualify the V, while a more specific external NP identifies the implied referent”

Caddo (Caddoan, USA; *ibid.* : 865): ‘eye’ > ‘round object’

- (36) a. *kassi'* *háh-'ič'á-sswí'-sa'*
 bead PROG-eye-string-PROG
 ‘She is stringing beads.’
- b. *ka'ás* *háh-'ič'áh-'í'-sa'*
 plum PROG-eye-grow-PROG
 ‘Plums are growing.’

Cross-linguistic perspective

Verbal classifiers (Aikhenvald 2000: 149):

- “Verbal classifiers appear on the verb, categorizing the referent of its argument in terms of its shape, consistency, size, structure, position, and animacy.”
- “Verbal classifiers **always refer to a predicate argument (usually S in an intransitive or O in a transitive clause)** and can co-occur with it.”
- “In a few languages, verbal classifiers **can also refer to peripheral arguments.**” (ibid. 162)

Cross-linguistic perspective

Purepecha (Tarascan, Mexico, Chamoreau 2017: 683)

- Several dozen “locative suffixes” most of which relate to parts of objects (including the body) and work as “locative verbal classifiers”.
- Some of the suffixes “indicate a specific physical area”:

- (37) a. *waxa-nu-x-ti* ‘He sat on the patio.’
 b. *waxa-ru-x-ti* ‘He sat in the street.’
 c. *waxa-k’ara-x-ti* ‘He sat inside the house.’

Cross-linguistic perspective

- Incorporation of spatial modifiers is uncommon in the languages of the world (Vinyar 2021).

Warray (Gunwinyguan, Australia, Harvey 1996: 144)

(38) *an-mewel at-windi at-mirral-lagi-yn*
CL-clothes 1SG.S-hang_out 1SG.S-sun-put-PST.PFV
'I hung the clothes out in the sun.'

Chukchi (Vinyar & Gerasimenko 2018: 97)

(39) *ramaj-patqantat-yʔ-e*
village-returnTH-2/3SG.S
'S/he returned from the village.'

Cross-linguistic perspective

- No languages have been reported so far that would **only** allow noun incorporation to target locative participants.
- Cf. Mithun (1984: 875)'s claim that all languages with noun incorporation minimally incorporate patients of transitive verbs.
- However, this can be due to fact that the definitions of noun incorporation are centered around the incorporation of the patient into a transitive verb in the first place.

Conclusions

- There is noun incorporation in the Northwest Caucasian languages.
- It is most robustly attested in Abaza and Abkhaz.
- It is typologically non-trivial:
 - only Mithun (1984)'s types I (V+N compound) and type IV (classifiers) without the intermediate types;
 - the class of nouns subject to incorporation is closed and the very process is no longer productive;
 - incorporated nouns invariably function as spatial modifiers, not as patients or absolutes.

Conclusions

- There is noun incorporation in the Northwest Caucasian languages.
- It is most robustly attested in Abaza and Abkhaz.
- It is typologically non-trivial:
 - even those incorporated nouns that retain their semantics and referentiality fall into one distributional class with unequivocal locative prefixes;
 - continuum from incorporated nouns to lexical affixes;
 - evidence of several successive layers of incorporation and ensuing affixalisation.

ŝə-zɪˈwáda-Da-ɾ
2PL.ABS-healthy-INC(AOR)-DCL
‘Thank you! Merci!’
